- Chapter 5: International Economic Integration: Behind the Expectation of Viet Nam
- Chapter 6: Viet Nam's Choice of Energy Policies
- Chapter 7: Viet Nam's Economic Prospects in 2014 and Policy Implications
- Appendices

The report has been conducted since 2009. Its research results have been published as a series of annual reports in order to summarize major economic issues in the previous year, provide an economic outlook for the coming year, and provide policy recommendations.

Following the success of the previous reports, this year's report, titled "The constraints to growth", aims to explore constraints to Vietnam's long-term economic growth. Those constraints require Vietnam to have a strong focus on reforming the economy, renovating the economic growth model, and figuring out a general socio-economic model for Vietnam in the future.

It is a key product of VNU's Strategic Research Program called "Economic Theories and Macroeconomic Policy in the condition of International Economic Integration of Vietnam".

By bringing readers valuable information and insightful analysis on critical issues for Vietnam's economy through an academic and systematic approach, the report is also part of the package of Independent Economic Assessments funded by the Australian Government's Department of Foreign Affairs and Trade for the 2014 – 2016 period.

Including 7 chapters and 2 appendices, the Report is really a valuable and reliable reference for researchers and policy-makers, social and economic institutions as well as all those who are concerned about the current economic situation of the nation..
